WORK EXPERIENCE

Accenture

2018- 2021

Senior Analyst - Amadeus AO

Bengaluru, India

- Led the billing team of European travel platform Amadeus for ETL, conducting ad-hoc analyses to interpret the trends in payment transactions, recording around 300 million Euros per month. Worked closely with France and Spain headquarters by translating the business needs to technical developments.
- Designed and developed quantitative reports, by analyzing and manipulating complex datasets to identify the KPIs. Deployed the insights using Tableau dashboards to keep the clients informed on performance measures. Won **ACE Award** for outstanding client support for Q3 2019. (Awarded to only 5% of employees.)

Infosys Limited

2014 - 2018

Senior Systems Engineer - Volvo Cars

Bengaluru, India

- Supervised the development team for global sales and accounting team identifying the gaps in sales and communicating the insights to various customers to aid strategic decisions for technical improvements.
- Developed a complex data pipeline and application to handle warehouse transactions of client. Won the **Best App Award** from Infosys at SAP roadshow 2016.

Poolka Technologies

2012-2014

Cofounder

Bengaluru, India

Poolka provides scalable visual recognition APIs to developers & businesses.

- Built **Fairi**, a fashion assistant chatbot that provides fashion recommendations based on social media trends.
- Selected for **Microsoft Bizspark** and **IBM Global Entrepreneur Program**.

COURSE PROJECTS

- Built a sentiment detection model by fine-tuning a Hugging Face's pretrained BERT model on Kaggle's Sentiment 140 dataset which has 1.6M entries. Effectively applied the model to predict an aggregate audience sentiment on Twitter for a given movie.
- Built an XGBoost classifier on Forest Covertype dataset with sample re-weighting. Performed hyperparameter tuning with Amazon Auto-Gluon. Best model resulted with 92.8 accuracy.
- Developed a virtual chatbot using Watson Assistant to process the natural language queries and answer the carbon emission details of food production life-cycle.

SKILLS

Languages

Python, C, C++, R, Java, JavaScript, SAP ABAP, \LaTeX

Skills

SQL, Tableau, SPSS, Advanced Excel, A/B Testing, Agile/Scrum, Jira, SDLC

Libraries/Frameworks

PyTorch, XGBoost, Pandas, Numpy, scikit-learn, Auto-Gluon, Hugging Face (BERT)
